JP Morgan Chase & Co.

B11, Nirlon knowledge park,
Goregaon, Mumbai,
Maharashtra - 400063

Respected Sir/Madam,

I am excited to submit my application for the Software Engineering Program (SEP) at JP Morgan Chase & Co. I'm currently in my Third Year of a Bachelor of Engineering in Information Technology program, at the Vivekanand Education Society's Institute of Technology, Mumbai. For the past 18 months, I have been working on Full Stack Web Development projects using a wide range of frameworks.

I'm currently working as a Software Developer Intern at Star Union Daichi Life Insurance where I am developing a stationery management system following proper agile practices. I'm also a part of the technical team of ISTE-VESIT and QuestIT- VESIT where I have developed the official website, conducted technical workshops, and contributed to various projects and events held during my tenure.

As a software developer, I have honed my skills in MERN stack, NextJS, Flask, and a variety of programming languages like JavaScript, Java and Python. I have also worked in the domain of Machine Learning and the knowledge that I gained during the process helped me win three hackathons and create useful products. In addition to my technical skills, I am a strong communicator and am comfortable working with cross-functional teams. I am also committed to continuous learning and professional development, and I always look for opportunities to expand my knowledge and skills.

This opportunity at your organization aligns perfectly with my aspirations as I prepare to start my career as a full-time working professional. I believe that I will be able to contribute to the growth of the company and establish myself as a useful asset. I have included my resume, which would give a detailed description of my knowledge, qualifications and past experiences working with technology. I appreciate your time and consideration in reading this letter and look forward to an opportunity to further discuss my profile.

Sincerely,

Atharva Bhoite
