RESPECTED SIR/MADAM,

I am excited to submit my application for the Software Engineering Program (SEP) at JP Morgan Chase & Co. As a highly motivated third-year Computer Engineering student at Vivekanand Education Society's Institute of Technology (VESIT), Mumbai, I possess a strong foundation in various technologies and a passion for applying them to solve real-world problems.

Over the past three years, I've actively sought opportunities to gain practical experience. During my recent internship at Pixolo Production as a Backend Developer Intern, I played a key role in building and maintaining real-world live products. I designed and implemented robust and scalable APIs that streamlined data handling, ultimately enhancing application efficiency. I continue to hone my leadership skills as Senior Technical Manager at Codecell, where I lead teams, conduct workshops, and contribute to various projects and events.

My diverse technical skillset encompasses MERN stack development (MongoDB, Express.js, React.js, Node.js), Next.js, Flutter for mobile application development, Flask for backend development, and proficiency in programming languages like Java, JavaScript, and Python. I am a strong communicator, thriving in collaborative environments, and my commitment to continuous learning ensures I stay current with the latest advancements in the field.

My passion for innovation is further demonstrated by my success in various Hackathons. This combination of technical expertise, problem-solving abilities, and a collaborative spirit makes me confident that I can effectively tackle the challenges presented by the SEP program. I am eager to contribute meaningfully to JP Morgan Chase & Co.'s continued success, and my resume provides further details about my qualifications.

Thank you for your time and consideration. I look forward to the opportunity to discuss my profile.

Sincerely,

Sadhak Kumar
